†Allergens from pet fur or dust mite activity.

Panasonic's Nanoe-X Technology is verified and approved by the National Asthma Council of Australia's Sensitive Choice Program

SENSITIVE CHOICE
nanoeX

A Better Life, A Better World

How does it work?

1. A small electrode inside the air conditioner generates Trillions of negatively charged water particles (Nanoe Particles)

2. The air conditioner disperses these particles throughout your room / house

3. The nanoe particles attach to unwanted airborne and surface based pollutants

4. The pollutants are deactivated
